

A measurable resource for collectors who need a better system

CardGhost is cloud-based record keeping for sports and trading card collections. Collectors can import a CSV, organize structured records, keep photos and notes attached, filter the collection, maintain their own values, and export their current records.

WHAT IS LIVE	WHAT WE NEVER CLAIM
CSV import and export Manual card records Photos, notes, quantities, costs, and values Filtering, history, and analytics MLB, NBA, NHL, and Pokemon	No automatic scanner No automatic or authoritative pricing No eBay synchronization No transaction or tax ledger No multi-user shop workflow

Pilot formats

Counter card	Place near supplies, grading intake, or checkout for 30 days.
Receipt or shipment insert	One tagged QR placement with an estimated impression count.
Collector workshop	A practical organization or CSV-import demonstration with affiliation disclosed.
Newsletter or site placement	One fixed placement with a unique link and no bundled traffic claims.

How success is judged

Each partner receives one campaign code. We review demo opens, confirmed signups, activated trials, paid conversions, and day-30 retention. A pilot does not renew because it produced impressions; it renews only when it produces activated collectors.

YOUR COLLECTION NEEDS A SYSTEM

Keep card details, grades, conditions, quantities, photos, notes, costs, values, and history together in one private cloud workspace.

Every card. One organized system.

Seven days free, then \$10 per month. A card is required to begin the trial. Cancel anytime. Collectors maintain their own values; CardGhost is not a live price feed or appraisal.
